DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 15-19, drawn to method of distribution of virtual fax, classified in class 705, subclass 26.
- II. Claims 1-14, drawn to database apparatus and search method, classified in class 707, subclass 3.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case --the apparatus as claimed can be used to practice another and materially different process such as *searching computer database, ranking and ordering database records, sorting Internet messages, organizing word processor documents etc..* the apparatus does not need to be used only for distribution of virtual faxes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2175

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Neveen Abel-Jalil at telephone number 703-305-8114.
